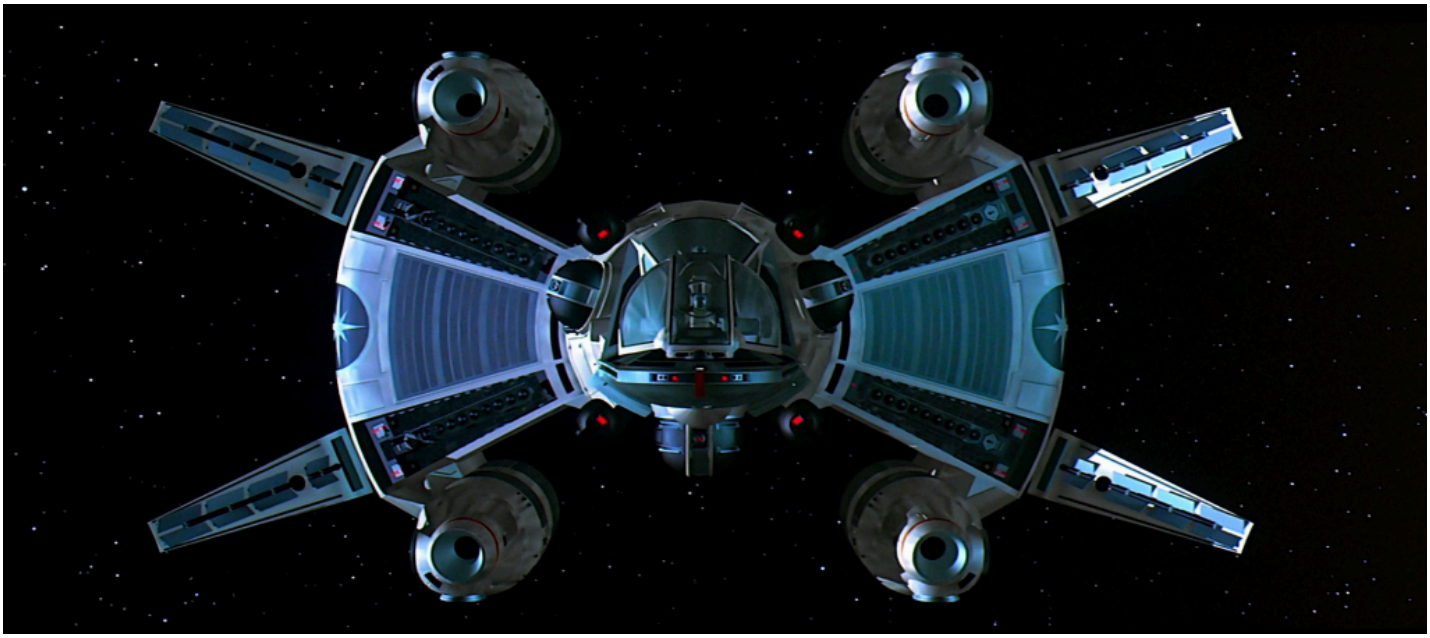
This LiveJournal was created for the purpose of discussing issues of interest to its owner - primarily in the field of military theory, military history and military technology - as well as posting other materials that, in the opinion of its owner, are interesting, worthy of discussion, or simply amusing.



- The owner of this diary does not suffer from remorse if he deservedly bans someone. The merit of the ban is determined by the owner of the diary. Yep.
- The owner of this diary is not always right, and admits this with a clear conscience, but if you want to convince him of this, stock up on LOGICAL arguments.
- The owner of this diary does not tolerate racism, sexism and homophobia. Deal with it.
- Politics is evil, because it gives rise to politics. Politics is evil because it is unproductive and does not bring any benefit. Therefore, a strong warning: when communicating here, **keep your opinions about the political orientation of others under control** . Thanks for understanding.
- **Repost information from this LiveJournal - please, only with a link to the source.**

The interests of the owner of this diary include:

- Military history (mainly the industrial era)
- Military theory
- Military technology (including conceptual and unrealized projects) - primarily the navy and early guided weapons (from the mid-19th century to the 1980s) x)
- Science fiction, mostly “ *hard sci-fi* ” or at least “ *semi-hard sci-fi* ”
- Old science fiction: pictures of the future made in retro
- Anime and cartoons of the 1980-1990s. Fanservice is evil!
- The favorite pony of the owner of this diary is Derpy. Deal with it.

LIST OF THE MOST INTERESTING (well, from my point of view, of course) BLOG MATERIALS :

My literary work:

* **MY LIBRARY ON FIKBOOK . Now everything will be there)**

Military theory:

* Alternative history questions: Why won't the battleships return?
* Alternative history questions: How to hide an aircraft carrier?
* Alternative history questions: About the survivability of aircraft carriers
* Alternative history questions: About the capabilities of aircraft carriers (part I)
* Alternative history questions: About the capabilities of aircraft carriers (part II)
* Alternative history questions: Nimitz vs. Kirov.
* Alternative history questions: B-36 vs Mig-15
* "War with a broken back"
* Alternative history questions: SDI myths and bluffs
* Alternative history questions: SDI combat lasers
* Defense against "Termite": missile defense of the American fleet in the 60s
* Alternatives to the tank: if not for the Holt tractor...
* Battleship torpedo tubes - what are they for?

Early guided weapons:

* Cycle "Mechanical Samurai": table of contents - articles about Japanese guided weapons in WWII.
* Cycle "Automatic Legionnaires": table of contents - articles about guided weapons in Italy in WWII.
* The series "Electronic Guardians of Albion": table of contents - articles about controlled weapons in Great Britain in WWII.
* Cycle "Wireless Musketeers": table of contents - articles on French guided weapons in WWII.
* The series "Lamp Soldiers of Freedom": table of contents - articles about America's guided weapons in WWII.
* Cycle “Remote-controlled Red Army soldiers”: table of contents - articles on controlled weapons of the USSR in WWII.
* First of the guided ones: Lay's torpedo

Guided weapons of the Cold War:

* S-25 "Berkut" - a miracle or a monster?
* MIM-3 "Nike Ajax" - a barrier made of thinking steel
* MIM-14 "Nike Hercules" - a wall of atomic fire (part I)
* MIM-14 "Nike Hercules" - a wall of atomic fire (part II)
* MIM- 104 PATRIOT: digital intelligence guarding the sky (part I)
* MIM-104 PATRIOT: digital intelligence guarding the sky (part II)
* MIM-72 "Chaparral": we molded it from what we had... and it turned out well!
* MIM-23 HAWK,
which is not a hawk at all (part I) * MIM-23 HAWK, which is not a hawk at all (part II)

*GAR-1 Falcon: the history of an unfamous missile
* GAR-1 Falcon: the history of an unfamous missile (continued)
* The history and design of the AIM-9 Sidewinder

* BGM-109 "Tomahawk": the most classic cruise missile (part 1)
* BGM-109 "Tomahawk" ": the most classic cruise missile (part 2)
* BGM-109 "Tomahawk": the most classic cruise missile (part 3)

* AGM-65 "Maverick" - an air wanderer in search of a target

* JDAM guided bombs: a cheap and widespread solution
* " Paveway" - the history of the laser-guided bomb

* From "Superfortress" to "Banshee": Uncle Sam's four-engine cruise missiles
* "Mace", great-grandmother "Tomahawk": relief navigation in the 1950s
* Robots in the pampas: post-war guided missiles of Argentina

Miscellaneous military electronics:

* Link's navigation/combat simulator
* Analog virtual reality: WWII torpedo simulators
* A little about radio interference
* Night eyes of American fighters: AN/APS-6 outboard radar

Unusual ships and their projects:

* FRAM: post-war modernization of American destroyers
* Major modernization Iranian Allen M. Sumner-class destroyers
* Major modernization of Taiwanese Giering-class destroyers
* Failed modernization of Alberto da Giussano-class cruisers into air defense cruisers
* ATLANTIKBOMBER-KREUZER and its GROßER version
* Squadron battleship "Abdul Qadir" - a sad story one long-term construction
* Ottoman armored modernizations
* Super-heavy cruisers of Generalissimo Franco
* Failed modernizations of the España-class dreadnoughts
* Japanese light battlecruiser of Project X from Yuzuru Hiraga
* Heavy cruiser "Harima Shipbuilding" for China: Project 1006
* "Light" cruisers "Mitsubishi" " for China
* Heavy cruiser "Uraga Dock Company" for China
* Hybrid battleship-aircraft carrier by Lee J. Levert (1947)
* Light battleship by Gene Anderson
* The last classic monitor
* Dynamite cruiser "Niteroi": the humble hero of the Brazilian counter-revolution

* Radio-controlled toys for sailors , part I:
"Iowa" and "North Dakota" * RC Toys for Sailors, Part II: "Four Tubes" and "Utah"
*RC Toys for Sailors, Part III: "Agamemnon"
* RC Toys for Sailors, Part IV: "Centurion"
* RC Toys for Sailors, Part V: "Zaringen", "Hesse", "Setzu" and "San Marco"
